## Applications

ACSE Solutions brings a wealth of experience in Oracle Fusion ERP implementation, offering solutions tailored to diverse business needs. Success requires careful planning, understanding business and technology interconnections, and integrating the functionalities. Partner with ACSE for seamless implementation and lasting business impact with Oracle Fusion.

### Enterprise Resource Planning (ERP)

- Enterprise Resource Planning (ERP)
  - Financials, PPM, Procurement, GRC
  - Enterprise Performance Management (EPM)
- Supply Chain & Manufacturing (SCM)
  - Supply Chain Planning, OM, INV, MFG, PLM, EAM
  - OTM, GTM, Warehouse Management.
- Human Capital Management (HCM)
- Customer Experience (CX)

## Consulting

ACSE Solutions' seasoned consultants provide time-efficient, proven solutions that optimize your investment. Using a fail-proof solution design, we apply an "explosion" technique to analyze the business process at the most granular level, meticulously decomposing each organizational process. We then seamlessly integrate and cement these processes into Oracle modules, ensuring every business function is fully addressed and optimized.

- Project Management
- Project Assessment
- Project Implementation
- Staying Ahead of ERP Curve

## Services

Our support services include site stabilization to ensure optimal system performance and minimize disruptions. We provide application managed services for ongoing maintenance and enhancements. Additionally, we offer comprehensive training programs to empower users, ensuring they are equipped to leverage the system effectively and maximize its benefits for the organization.

- Application Management Services
- Development Services
- Site Stabilization Services
- Support Services
- Training

## Engineering

Our Oracle engineering services utilize Oracle Cloud Infrastructure (OCI), generative AI, and advanced data structuring to create tailored solutions. We integrate Python automation and machine learning for streamlined processes and insights, while employing testing tools to ensure application reliability. These services optimize operations and drive confident digital transformation for organizations.

- Gen AI, LLM
- OCI Application Tuning and Optimization
- Business Process Reengineering
- Master Data Restructuring
- Testing Tools and Technology
- Robotic Process Automation

# Solutions

OIC Integrations with Fusion Applications, Cloud to Cloud, Cloud to OnPrem

Hub and Spoke for Restaurant Industry

OTL to Projects, HCM and ADP integrations

Centralized Procurement and 3rd party logistics solutions

EDI's – Order to Cash, Procure to Pay, Inventory Transactions

Approval management with custom rules

Costing, Process and Discrete solutions for Steel, Lifesciences and Restaurant Industries

Enhanced SLA design for alternate and additional accounting entries

Multi Country Rollouts, North America, Mexico, UK, Europe, Australia

B2B Solutions in VBCS, Redwood Framework

Custom Mobile Application development – warehouse management, shipping and receiving, palletization and more

Fixed Asset Approvals, Scan Physical Count using APEX

APEX with Generative AI

RPA, Machine Learning and Python Automations via email integrations

Blackline and OneStream Integrations

EAM for Oil and Gas Industry

## Oracle Cloud AMS Benefits

In today's fast-paced business environment, maximizing the value of technology investments is crucial for success. Oracle Cloud Applications provide essential capabilities across various functions, including ERP, CRM, and HCM. However, effectively managing these applications can be challenging, often requiring significant time and resources.

This is where Oracle Cloud Applications Managed Services (AMS) come in. ACSE is dedicated to helping businesses fully leverage AMS, enabling them to streamline operations and focus on strategic priorities.

By partnering with ACSE, businesses can optimize their Oracle Cloud Applications, ensuring they perform at their best while freeing internal teams to drive innovation and growth.

**Oracle Cloud AMS offers a robust suite of services that simplify the management of Oracle Cloud Applications.**

Key offerings include:

**1**

Software Upgrades and Patches: Ensuring your applications are up-to-date and secure.

**2**

Performance Monitoring: Continuously tracking application performance to identify and resolve issues proactively.

**3**

Ongoing Support: Providing expert assistance to address any challenges that may arise.

**4**

Usage Management: Managing user licenses effectively and in compliance with Oracle's licensing agreements.

**Trust and reliability built with over a decade of dedicated service.** Our commitment to excellence has allowed us to adapt and evolve alongside our clients, ensuring and gaining their trust. We pride ourselves on our high customer retention and testimonies from our clients. As we look to the future, we remain focused on delivering the highest quality service and maintaining the strong partnerships and grow it further that have defined our success.

We deploy rapidly evolving digital and integrate modern technologies with proven services for driving innovation and efficiency. With ACSE deploy cutting-edge solutions such as Oracle Fusion Cloud and Managed Services, Gen AI, RPA, OCI, Python Automations, OIC, APEX, VBCS, enhance your customer experiences, and make data-driven decisions.

We deliver **trust** with every commitment
